Summary

Experienced Software Engineer with 4 years of expertise in developing and maintaining scalable web applications using Java, Spring Boot, MySQL, and React.js. Passionate about writing clean, efficient code and optimizing system performance. Looking to contribute my skills in back-end development, microservices, and front-end technologies to build innovative solutions.

Technical Skills

Programming Languages: Java, Python, JavaScript
Frontend Technologies: HTML, CSS, ReactJs, TypeScript, JSP
Backend Technologies: Spring Framework, Spring Boot, microservices, RestAPIs
Database Management: MySQL, Oracle SQL, MongoDB
QA: JUnit, Mockito, Jest, Unit Testing, Integrated Testing, Manual Testing
Operating System/Tools: Linux, Eclipse, VSCode, IntelliJ
CI/CD Tools: Jenkins, Gitlab, Github
Version Control Systems: SVN, Git

Experience

FactSet Research Systems

March 2025 - Present

Software Engineer III

Hyderabad, Telangana

- Developed and optimized API functionalities for Corporate Debt and Private Placement Debt as part of the Cusip Request system, ensuring seamless integration and enhanced operational efficiency.
- Undertook significant improvements to expand API capabilities across multiple domains, focusing on robustness and accuracy.
- Implemented an automated Scheduled Job process aimed at the timely reclassification and withdrawal of Private Equity Cusip, reducing manual overhead and improving process reliability.
- Contributed to both backend and front-end development for the IIN application, implementing key changes related to relinquishment processes.

Zemoso Technologies

November 2024 - February 2025

Software Engineer III

Hyderabad, Telangana

- Designed and developed a full-fledged application using Java, Spring Boot, and MySQL.
- Implemented efficient database schemas and API architecture to enhance performance and scalability.
- Developed secure authentication mechanisms using Spring Security and JWT tokens.
- Leveraged Spring Data JPA for seamless database interactions and optimized query performance.
- Ensured application reliability by writing comprehensive unit and integration tests using JUnit and Mockito.
- Built a responsive and dynamic frontend using JavaScript and React.js, improving user experience.

MedPlus Health Services Private Limited

September 2021 - October 2024

Software Engineer

Hyderabad, Telangana

- Developed and maintained scalable software applications using Java, Spring Boot, and React.js.
- Developed the Marketing-Service application using Spring Boot to create dynamic templates and display them to customers, enhancing marketing automation and personalization.
- Led the migration of a large-scale monolithic application to a distributed microservices architecture, improving performance and scalability.
- Designed and implemented the Maker-Checker process for Marketing Popup Configurations using Java, Spring Boot, MySQL, and React.js.
- Redesigned and migrated the product listing page from JSP to React.js, enhancing UI/UX and improving maintainability.

Projects

Appsmith | *ReactJs, TypeScript, HTML, CSS, Jest, Storybook, Git*

- Developed interactive and responsive user interfaces using React.js, ensuring seamless user experience across devices.
- Implemented TypeScript to enhance code quality, maintainability, and type safety.
- Refactored existing JavaScript codebase to TypeScript, improving scalability and reducing runtime errors.
- Built reusable components in React.js, following component-driven development to improve code modularity and reduce duplication.
- Wrote unit tests with Jest, achieving high test coverage and ensuring application stability.

Checker Application | *Java8, SpringBoot, MySql, Git, Gitlab*

- Recruiter can verify the background details of the candidate before hiring.
- Designed and developed the application following modular and scalable architecture using Java, SpringBoot, and MySql.
- Implemented RESTful APIs for seamless integration and efficient data retrieval.
- Written JUnit and Mockito test cases with coverage up to 100% and ensured build quality using SonarQube with quality gate pass.

MedplusMart | *Java, Spring Boot, MySQL, Redis, Javascript, ReactJs, React-Redux*

- Developed the user interface for the catalog page using Java, SpringBoot, and ReactJS.
- Implemented key features like filtering, sorting, and product listing to enhance user experience.
- Utilized advanced web development techniques to ensure optimal performance and responsiveness.

Customer Relationship Management | *Java, SpringBoot, MySQL, JavaScript, Angular, ReactJs, React-Redux*

- Developed and implemented the Dynamic Forms using HTML, CSS, ReactJs, and JavaScript. The forms will be created based on the user's custom inputs.
- Reduced code complexity and improved maintainability and readability by refactoring existing code in Java using streams and collection frameworks.
- Developed comprehensive unit and integration tests to ensure maximum code coverage, minimizing the risk of regressions and unexpected behavior.

Education

Marri Laxman Reddy Institute of Technology and Management

Bachelor of Technology (CGPA: 7.80 / 10.00)

06/2017 - 05/2021

Hyderabad, Telangana

Certifications & Courses

- Completed **Spring Boot** Development course on Udemy by **Chad Darby**.
